Kevin Becker

OBJECTIVE

I am looking for an opportunity that utilizes my skill set as a .NET developer. The ideal job would be challenging and fulfilling working with other talented individuals. I enjoy educating other developers and end users to make their experience with technology better.

SKILLS

- ASP.NET Core
- Entity Framework, LINQ
- C# using Visual Studio
- MS SQL, Azure SQL, MongoDB
- HTML/JavaScript/CSS/Less/SCSS
- IIS and Microsoft Azure
- Sitecore 8 Experience Platform

- Git and Azure DevOps CI/CD
- WCF creating and consuming REST APIs
- Front end libraries Vue.JS, jQuery, Bootstrap
- iOS App Development in XCode
- Objective-C and Swift
- Microsoft Office and Adobe Creative Cloud
- Hangfire, Telerik for Blazor

EXPERIENCE

SenioROI – Charlotte, North Carolina   March 2021 – Present
Application Development Manager

Responsibilities
- Work with offshore resources on existing development projects.
- Gather and document requirements from stakeholders to design and develop web-based internal facing .NET business applications.
- Set up and maintain web server running IIS, MSSQL, and MongoDB.
- Implement automation where advantageous to the business.

Latest Projects
- ADAS 2.0 – Automate the process of cleansing address information through the NCOA database and apply business rules to create a final mail file.
- Validify – Pull data from various CRMs, send through NCOA, then through a data append server, and finally push appended and cleansed data back into the CRM, all through APIs.

Other Projects
- Count Portal – Create lists of individuals based on demographic criteria.

Sports Business Journal – Charlotte, North Carolina   November 2010 – October 2021
Software Engineering Manager

Responsibilities
- Lead team of .NET web developers; assign tasks and perform code reviews.
- Gather requirements from stakeholders to design and develop web-based internal facing .NET business applications designed for Azure.
- Develop new modules and templates in Sitecore for the public facing website.
- Administer and maintain Azure Cloud resources as well as setting up Git repos and CI/CD in Azure DevOps.
- Create and maintain various databases in Azure SQL.
- Develop and maintain API endpoints for custom iOS and AJAX applications.

Latest Projects
- Incorporated front-end code from design firm into Sitecore website.
- Built middleware data flows between ecommerce website and Salesforce.

Other Projects
- Migrated 20+ years of editorial content from Sitecore 6 to Sitecore 8 while implementing a new front-end design and migrating to Azure.
- Provisioned and configured new VMs for website redesign launch.

Crescent Resources, LLC – Charlotte, NC   June 1998 – October 2010
Computer Programmer
- Gather requirements, develop, and maintain internal business tools such as WinForms and Webforms for end users.
- Work with the marketing team and agencies in creating and maintaining public facing websites for a dozen real estate properties across the Southeast US.
- Develop web-based portals for use by home builders and Realtors to access internal resources and data.
- Started as desktop support before transitioning into a programmer role.

EDUCATION

North Mecklenburg High School - Huntersville, North Carolina   June 1996
Certified Sitecore 6.5 Developer   2012
